

## COSHH Risk Assessment

### Blu Away

Date of assessment	14/12/2025
Site	Spotless Client Sites - Commercial and Domestic
Assessor	PH
Substance name	Blu Away
Quantity normally stored	1 x 5L bottle  <i>Important: Make sure that if it is decanted into another container, that the other container is suitable for use and is correctly labelled.</i>
Task/Use	Biological washroom cleaner and urine neutraliser.  Eradicates organic staining and odour problems from all washroom surfaces, including floors and walls contaminated with urine. Simply spray and wipe all ceramic surfaces to control scale and soiling. Remove uric scale build-up and urine soiling by diluting and swabbing floors to clean thoroughly and eliminate odour
Copy of the MSDS provided?	Yes
Is there a significant risk from the substance?	Yes
If Yes, what is the level of risk before control measures?	Medium
What are the significant risks?	
<p>Hazard Statements (CLP): H302, H320, H312, H411</p> <p>Precautionary Statements (CLP): P102 Keep out of the reach of children</p> <p>P301+P312 IF SWALLOWED: call a POISON CENTRE or doctor/physician</p> <p>P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</p>	
Hazard Pictogram Corrosive (GHS05)	NA

Hazard Pictogram Environmental Hazard (GHS09)	NA
Can the substance be eliminated or replaced with a safer alternative?	No
If the substance cannot be replaced, is there a safe method for using it?	Yes
<p>If <b>YES</b>, please explain how the substance must be used safely. Make sure you have controls for all of the risks identified above.</p> <p><b>NOTE THAT THE CONCENTRATED CHEMICAL IS FAR MORE HAZARDOUS THAN THE DILUTED, READY TO USE MIXTURE.</b></p> <ul style="list-style-type: none"> <li>•Gloves and goggles to be worn when dispensing and applying</li> <li>•Gloves to be worn at all times during cleaning to prevent skin irritation</li> <li>•Always wash hands thoroughly after handling/cleaning, even if gloves have been worn</li> <li>•Wear masks in poorly ventilated areas or confined spaces</li> <li>•Dispense the concentrated chemical into water, not water into the concentrated chemical</li> </ul> <p><i>Remember: personal protective equipment (PPE) should be the last control method as it is the most likely to fail.</i></p>	
Are there any foreseeable situations where or when the substance should not be used?	No
If <b>Yes</b> , state where or when the substance should not be used?	
Where is the substance to be stored?	On company vehicle or COSHH cupboard at office or Client COSHH cupboard
How should the substance be stored?	<ul style="list-style-type: none"> <li>•Out of the reach of children or pets</li> <li>•Chemical must be stored safely, low level for 5L bottles and always in the upright position with lid securely in place</li> <li>•Must be stored at room temperature, do not allow to freeze</li> <li>•Do not eat, smoke or drink when using the product</li> </ul>
Are there any control measures required for dealing with spillages?	Yes
<p>If <b>Yes</b>, identify the control measures required.</p> <p>Ventilate spillage area. Avoid contact with skin and eyes.          Avoid release to the environment. Soak up spills with inert solids, such as clay or diatomaceous earth as soon as possible.</p>	
<p>Are there any specific first aid measures that need to be identified from the MSDS?  <i>e.g. if there is a need to irrigate the eyes for 15 minutes, is there a need to provide equipment so that it is possible to run water for that length of time?</i></p>	

**First Aid Measures**

Inhalation: If affected, remove to fresh air, keep warm and at rest. Obtain medical attention in severe cases.

Skin Contact: Wash skin with water. In severe cases consult a doctor.

Eye Contact: In case of contact, rinse immediately with plenty of water for at least 10-15 minutes. Obtain medical attention if irritation persists

Ingestion: Do not give anything by mouth to an unconscious person. Wash out mouth with water and give copious amounts of water to drink. Do not induce vomiting. Obtain medical advice if patient unwell.

**Most Important Symptoms and Effects, Both Acute and Delayed**

Symptoms/effects after inhalation: Mist may cause irritation to the respiratory tract.

Symptoms/effects after skin contact: May cause irritation

Symptoms/effects after eye contact: May cause mild irritation.

Symptoms/effects after ingestion: May cause irritation to the mouth, throat and digestive tract

**Indication of any immediate medical attention and special treatment needed**

Treat symptomatically

Identify any other issues if appropriate.

Have you identified anything in this risk assessment that may need to be linked to other risk assessments?  
*e.g. flammable substances linked to fire risk assessment, mutagenic properties with the potential to cause damage to a foetus linked to pregnant worker risk assessments, irritants that may affect a person with medical issues, etc.*

No

If **Yes**, specify the issues that are needed to inform other risk assessments:

What has the level of risk been reduced to by implementing the previous controls?

Low
